DEVELOPMENTS IN FINANCIAL MARKETS

The BRD Euro Fond Fund recorded a slight increase in the unit value of net assets in April, in the context of a predominantly negative evolution of EUR-denominated Romanian government bond prices. In April, sales of EUR-denominated government securities predominated, with yield increases (price decreases) being recorded across the entire government bond yield curve. Volatility prevailed on international financial markets, with increased risk aversion in the context of tariffs fueling sales of risky financial instruments (including emerging market sovereign bonds). In addition, the approach of the presidential elections in Romania (in early May) contributed to the negative evolution of Romanian government bond prices. The accumulation of the interest rates and coupons offered by the financial instruments in the portfolio offset the negative movement in government bond prices.
