WHAT IS THIS PRODUCT?

Fund type: FDI BRD Acţiuni is an Undertaking for Collective Investment in Transferable Securities (UCITS) and promotes environmental and social characteristics in accordance with Article 8 paragraph (1), (2) and (2a) of Regulation (EU) 2019/2088.

Term: This product does not have a predefined term, but the minimum recommended term is of 5 years. However, the fund units can be redeemed on demand at any time, and are continuously redeemable.

Objectives: Obtaining a long-term performance superior to the individual investment in stocks listed on the Bucharest Stock Exchange but also to those listed on stock exchanges from Central and Eastern Europe, The performance of the product is closely linked to the development of the regional stock market indices. During a holding period below the recommended period, the product may have a higher volatility. The fund does not specifically track any index.

Instruments: The Fund invests mainly in Romanian shares but also in shares from Central and Eastern Europe, the long-term strategic equity allocation being 90%. These instruments should not affect an investor's ability to redeem units on demand. The Fund does not distribute dividends, the profit obtained from the investment being reinvested in the Fund and included in the fund unit value that is published every business day. The fund can also invest in other categories of instruments, such as bonds and derivatives. The Fund promotes environmental and social characteristics and expects the issuers in which it invests directly or indirectly to follow good governance practices, but does not have a sustainable investment objective, nor does it aim to have a minimum proportion of sustainable investments. The investments underlying this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Markets: The Fund's investment is not limited to the Romanian market, but they prevail. Investment in securities from the European Union, the European Economic Area and non-EU Member States of G7 are also included, as well as Switzerland.

Investor type: Given the Fund's objectives and investment policy, the Fund is addressed to investors interested in investing in the Romanian stock market in particular, but also in the stock markets of Central and Eastern Europe. As a result, the profile of the investor to whom the Fund is addressed is the one who has defined a long-term investment horizon and who undertakes the risks provided for in the prospectus.

Other information: The Fund's depositary is BRD - Groupe Societe Generale. The documents and reports of the fund, as well as the latest fund unit values can be found at www.brdam.ro.

The risk indicator assumes you keep the product for the minimum recommended period of 5 years. The actual risk can be significantly higher if you keep the product for a shorter period than the minimum recommended and you may receive a smaller amount than the one invested. The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. We have classified this product as 3 out of 7, which is a low-medium risk class. This rates the potential losses from future performance at a low-medium level, and poor market conditions could impact the Fund's capacity to pay you.

The Fund is denominated in RON but also has classes in other currencies and their return may vary depending on the fluctuations of these currencies against the national currency.

The risks relevant for the Fund are not included in the synthetic risk indicator (SRI):
The liquidity risk - is related to the ability to meet payment obligations when they are due without incurring unacceptable costs. The Fund's investment will be made on different markets whose liquidity may vary. The conditions of reduced or null liquidity at a given time on one or more of these markets may have a negative impact on the fund unit value, especially in case of significant changes in its asset.
The operational risk - is the risk of a loss determined either by the use of inadequate processes, systems or human resources or that did not fulfil their function properly, or by external events and actions.

The likely estimated impact of the Fund's sustainability risks is medium.

This product does not include any protection against future market performance and therefore you may lose all or part of your investment. The tax legislation of the individual investor's home Member State may have an impact on the actual remuneration.
