WHAT IS THIS PRODUCT?

Fund type: FDI BRD Obligațiuni is an undertaking for collective investment in transferable securities (UCITS).

The period: This product does not have a predetermined duration, but the minimum recommended duration is three years. However, fund units may be redeemed on demand at any time, and are continuously redeemable.

Objectives: The Fund objective is to seek an active valorisation of resources collected through investment on different financial markets, with a focus on the corporate and government bond segment. Product performance is closely related to developments in the returns on corporate bonds, as there is an inverse relationship between price and return (e.g. when the return increases, the price drops). For a holding period shorter than the recommended period, the product may have higher volatility. The Fund does not expressly track any index.

Instruments: Fund assets will be invested mainly in corporate bonds, but also in other liquid assets such as government securities and bank deposits. The Fund may also invest in other categories of instruments, such as derivatives and units issued by other UCITS. At least 70% of the Fund assets have exposure to the local currency (either directly or indirectly, by investment in derivatives). These instruments should not affect an investor's ability to redeem units on demand.

The Fund invests no more than 10% of its assets in units issued by other UCITS and alternative investment funds (AIF).

The Fund does not invest in stocks (except for the conversion of convertible bonds for which the Manager pursues liquidation from the portfolio).

The Fund does not distribute any dividends, and the income obtained from investment made (e.g. coupons and interests) is reinvested in the Fund and included in the fund unit value which is published every working day.

Markets: Fund investment is not limited to the Romanian market, since investment in securities, money market instruments, units and derivatives from the European Union, the European Economic Area and non-EU G7 Member States are also targeted, as well as Switzerland.

Investor type: Taking into account Fund objectives and the Investment Policy, it is addressed to investors aiming at obtaining capital gains subject to moderate fluctuations through corporate bond exposure.

Other information: The Fund Depository is BRD - Groupe Societe Generale. Fund documents and reports, as well as the latest values of fund units may be found at: www.brdam.ro.

WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

The risk indicator assumes you keep the product for the minimum recommended period of 3 years. The actual risk can be significantly higher if you keep the product for a shorter period than the minimum recommended and you may receive a smaller amount than the one invested. The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. We have classified this product as 2 out of 7, which is a low risk class. This rates the potential losses from future performance at a low level, and poor market conditions are very unlikely to impact the Fund's capacity to pay you.

The risks relevant for the Fund are not included in the synthetic risk indicator (SRI):

The liquidity risk - is related to the ability to meet payment obligations when they are due without incurring unacceptable costs. The Fund's investment will be made on different markets whose liquidity may vary. The conditions of reduced or null liquidity at a given time on one or more of these markets may have a negative impact on the fund unit value, especially in case of significant changes in its asset.

The operational risk - is the risk of a loss determined either by the use of inadequate processes, systems or human resources or that did not fulfil their function properly, or by external events and actions.

The likely estimated impact of the Fund's sustainability risks is medium.

This product does not include any protection against future market performance and therefore you may lose all or part of your investment. The tax legislation of the individual investor's home Member State may have an impact on the actual remuneration.

<i>Recommended holding period: 3 years</i> <i>Investment example: RON 50 000</i>		<i>If you redeem after 1 year</i>	<i>If you redeem after 3 years (recommended period)</i>
<i>Scenarios</i>

The figures shown include all costs of the product itself; but may not include all costs you pay to your advisor or distributor. The figures do not take into account your tax situation, which can also affect the amount you receive. What will you get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. The unfavourable scenario occurred between 01.11.2019-31.10.2022, for the recommended investment period. The moderate scenario took place between 01.12.2016-29.11.2019, for the recommended investment period. The favourable scenario took place between 01.11.2022-30.09.2025, for the recommended investment period. Markets could perform very differently in the future. The crisis scenario shows what you can achieve in extreme market circumstances.

WHAT HAPPENS IF BRD ASSET MANAGEMENT S.A.I IS UNABLE TO PAY OUT?

This product is not covered by any guarantee scheme. There is a potential risk of not obtaining the expected return and even of losing the initial investment. This risk arises from the financial instruments held in the Fund's portfolio, as a result of adverse changes in the creditworthiness of the counterparty or the issuer of a financial instrument, as they may end up not fulfilling their obligations on time or in their entirety.

According to the specific legislation, the assets of the funds are separated from the assets of the Manager, BRD Asset Management S.A.I., and are not affected in the event of the Manager's potential inability to pay.

WHAT ARE THE COSTS?

The person selling you this product may charge you other costs. In this case, it will provide you with information on those costs and show you the impact of all costs on your investment over time.

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you own the product and the product performance. The amounts shown here are illustrations based on an example of an invested amount and on different possible investment periods.

Costs over time

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods, we have assumed the product performs as shown in the moderate scenario
